

EXPERIENCE

BETTERUP

FULLSTACK DEVELOPER INTERN

Jan 2025 – April 2025

- Empowering employees to achieve their full potential through innovative solutions
- Leading transition from [EmberJS](#) to [React](#) on the Partner Experience Team
- Tackled a wide range of technical challenges across the stack ([RoR](#), [Postgres](#), [Kubernetes](#), [EmberJS](#), [React](#))
- Shipped scalable features for 100+ partners including Google, Microsoft, Disney, Salesforce, etc.
- Working closely with cross-functional teams to maximize impact (Platform, Infra, Analytics, Product, Design)

TESLA (co-op student of the year nominee, received return offer)

VEHICLE SOFTWARE INTERN

Jan 2024 – August 2024

- Worked on & led development of bespoke vehicle and mobile prototypes experimenting with new interaction patterns ([React](#), [Svelte](#)). Significant use of prototyping by code.
- Owned & shipped 4 in-vehicle media apps (primary contributor) including Youtube, Amazon, and Audible. Worked closely with Test Engineers, Solutions Architects, and Product Designers.
- Worked on Tesla Diner, RoboTaxi, and many other confidential projects which regrettably cannot be shared

CUMULESS (startup, [website](#), [demo](#))

CO-FOUNDER & CTO

Aug 2023 – Dec 2024

- Cumuless connects to an enterprise's *knowledge sources* (Confluence, Teams, etc.) and makes all content semantically searchable & chattable in a smart, VPC enclosed, user-access aware environment. Raised \$25k
- Sole Developer on this project. Tools + Services used include: [Next.js](#), [Python](#), [AWS \(EC2, VPCs, Bedrock, etc.\)](#), [LLM](#), [RAG](#)

HUAWEI

SOFTWARE DEVELOPER INTERN

May 2023 – August 2023

- Developed tools ([C++](#), [Assembly](#)) to enhance performance of Huawei's LLVM BiSheng Compiler

CIBC (Canadian Imperial Bank of Commerce)

CLOUD ENGINEER INTERN

May 2022 – August 2022

- Used [Azure DevOps](#) and took on deployments of multiple resources ([Databricks](#), [Key Vault](#), [VMs](#))

SV ROBOTICS

SOFTWARE DEVELOPER - CONTRACT

February 2020 – September 2020

- Created a Data Analytics Tracking Software ([HTML](#), [JS](#), [SQL](#)) to manage company finances
- Created a virtual classroom & IDE using [Flask](#), and various APIs. Co-lead Project Development Team (10-15 employees)

References available upon request

SKILLS - FRONTEND

Languages HTML/CSS/JS, TS, SwiftUI
Frameworks Next.js, React, Svelte, EmberJS, Vue.js, RoR
Graphics + 3D THREE.js (R3F), Blender, GLSL
Build Tools Vite, Webpack, Babel, Rollup

I have generally worked in depth on every skill listed above through work experiences and personal projects

SKILLS - BACKEND

Languages Java, JS, Python, Go, Ruby, Rust
Infra AWS, Azure, Terraform
DBs SQL (Postgres), NoSQL (Mongo, Firebase), ELK, Vector DBs (Milvus, pgvector)

PERSONAL PROJECTS / AWARDS

I love engaging in extra-curricular projects and competitions as opportunities to expand my technical skillset

- **Hand-Controlled Drone** - A drone, made from scratch, that is piloted by a custom-made glove ([C++](#), [Computer Architecture](#))
- **Digital Scantron** - A testing system for students and teachers to streamline grading and detect cheating ([C++](#), [React](#))
- **(MIT) HackMIT (Second Place)** - A VR classroom where students can experience school during the pandemic ([Unity](#), [React](#))

Projects with detailed descriptions available on personal site: araadshams.com

EDUCATION

UNIVERSITY OF WATERLOO

4th YEAR - BACHELORS, COMPUTER SCIENCE

September 2021 – Dec 2025 (expected)

- Currently standing at 3.9 GPA. Studied: **DSA, OS, Optimization, DBMS, UX**
- Involved in the Velocity Startup Incubator Program, executive in the Muslim Student Association
